

Driving Licence Authority – Authority of Public Order

Dear Reader

On this page we provide you with general information about the availability, contacts and services of the Driving Licence Authority.

Further content is provided for you in the links which are predominantly in the German language. We aim to change this gradually. However for various reasons this is not always possible.

The Driving Licence Authority fulfils delegated, sovereign tasks based on the decree on driving licences in accordance with federal law. These tasks are primarily regulatory in nature. One service is, for example, issuing driving licences in order to drive motor vehicles. The Driving Licence Authority can also, under certain conditions, order the revocation of the driving licence or the prohibition of driving all types of vehicles (including licence-free vehicles such as bicycles).

Important tasks/services:

- First issue of driving licences
- Adding higher classes of driving licences
- Extension of driving licences
- Exchange of driving licences
- Conversion of driving licences under old law into driving licence cards
- Reissue (following revocation) of driving licences
- Issuing replacement driving licences
- Issuing international driving licences
- Granting permission to carry passengers
- Organisation of the local knowledge test
- Organisation of the declaration in lieu of an oath about the loss of the driving licence
- Ordering measures as part of probationary permission to drive and the points systems (cautions, revocation of driving licences, ordering of driving seminars)

Important services in detail:

- [Applying for and collecting driving licences](#)
