## The Environmental Information Centre

Information, advice and environmental education

*Dear Readers,*

*The Umweltinformationszentrum (UiZ) [Environmental Information Centre] was founded and set up by the Environmental Protection Office of the City of Leipzig in 1993 and has established itself as the ecological advice, information and communication centre for citizens, guests and educational institutions.*

*Our task is to inform interested parties of any age about environmental issues and to raise awareness about environmental concerns. Environmental issues, whether for interested parties from the private sector or organisations, are communicated via informative, rental and educational offers. Employees of the Environmental Information Centre are also available in person in the bike shop, by email or phone for any requests.*

*The Environmental Protection Office warmly invites you to use the various information opportunities in the Technisches Rathaus and looks forward to your visit.*

*Peter Wasem  
Head of Office for Environmental Protection*

## Publication of environmental information

### Main topics

- Landscape and nature conservation
- Water
- Energy, ecological building, climate protection
- Immission control
- Waste control and soil protection
- Health, nutrition, agriculture
- Environmentally friendly procurement
- current environmental issues

### Presentations

In the foyer of the Technisches Rathaus and in the UiZ bike shop there will be regularly changing presentations

- by the Environmental Protection Office,
- other offices,
- and external lenders.

### You can find us

- in the UiZ bike shop on the ground floor of the Technisches Rathaus,
- with our mobile stand of major public events,
- at partner events (e. g. on open days).

Placement of promotional material in the UiZ shop
