

Corona Vaccination

Getting vaccinated helps!

Corona is dangerous for some people! It makes some people seriously ill. Some people die from it.

The vaccine protects you!
You will not get seriously ill!

Getting vaccinated protects other people who cannot be vaccinated.

Vaccinations are also possible for:

- Children from the age of 5
- Pregnant persons
- Most people with severe illnesses
schlimmen Krankheiten

If a lot of people are vaccinated, we can avoid the closure of schools, shops and cafés.

Where can you get vaccinated?

Your **GP** can administer the vaccine.
Please make an appointment.

You can get vaccinated at a **mobile vaccination centre**. At most places you do not need an appointment. You can find a list of centres at www.leipzig.de/corona-impfung

What do you need to get vaccinated?

Vaccination card

Health insurance card

ID card

If you don't have an ID card and/or don't have a health insurance card, you will be vaccinated by a mobile vaccination team.

Which vaccines are approved for use in Germany?

- Comirnaty® by **Biontech/Pfizer** (mRNA)
- Spikevax® by **Moderna Biotech** (mRNA)
- Nuvaxovid® by **Novavax** (proteine based)
- Vaxzevira® by **AstraZeneca** (viral vector)
- Covid-19 Vaccine Janssen® by **Johnson & Johnson** (viral vector)

You will discuss with the doctor which vaccine is best for you.

What are the possible side effects?

pain at the
injection site

feeling
generally under
the weather

headache

fever

If you feel very ill, you
should go to the **doctor** or
call an **ambulance**.

What do you have to pay attention to afterwards?

You should rest after the vaccination.
You should not exercise.

Continue to observe the hygiene rules!

Are the vaccines safe?

The vaccines have been tested very carefully.
The tests were carefully analysed.

Several billion people around the world have now been vaccinated. Serious side effects are very rare.

The benefit of the vaccination outweighs their risks!
